

■ Company Profile

Kingston Machining & Casting LLC was established to provide machining and casting services for small and medium sized businesses worldwide. We aim to compliment the KINGSTON brand of manufacturing businesses in providing quality products, competitive pricing, and excellent service.

Kingston Machining & Casting LLC is the latest addition to the Kingston line of manufacturing businesses (Shanghai Kingston Foundry Co. Ltd. and Kingston Machine Tool Mfg. Inc.). Our company grew from the export division of Shanghai Kingston Foundry Co. Ltd., a major supplier of OEM/ODM services to the North American water industry. With the increase of sourcing demand for businesses around the world, Kingston Machining & Casting LLC was established specifically to cater to the needs of our international clients.
